

Promoting the ecology of student support through expansion of HPAC programming during the 2023-2024 academic year

➤ HPAC Peer Ambassadors (10) visited Western University of Health Sciences a few days before kicking off Fall '23 as part of their training to explore a variety of health professions programs. This experience allows ambassadors to support pre-health peers (*First and Second Years*) who have interest in health professions programs such as dentistry, optometry, pharmacy, and so forth.

➤ Fall 2023, HPAC funded 9 pre-health students on a weekend field trip to visit UCSF Medical Campus, attend the UC Davis Health Professions Conference & Fair, and visit Samuel Merritt University to explore health professions careers and meet with faculty and current medical/dental/pharmacy students to learn about being a future health provider.

➤ Partnered with the Veterans Resource Center (Student Affairs) at their space to discuss health professions careers and pre-req. course advising during Winter '24.

"The drop-in advising at the Veterans Resource Center has been invaluable for students to speak with an advisor in a familiar environment. HPAC's attendance at our Virtual Resource Fair gave students options for their path, that they may not have otherwise been aware of. Our collaborations with HPAC have helped many of our students be successful."

- Tami Thacker, UCR Veterans Services Coordinator

- Continued diversity in the catalog of workshops and events during Spring '24
